Gig Ledger

AI CO-PILOT FOR INDEPENDENT WORKERS

The Financial Operating System for the Independent Workforce

AI-Powered
Financial Co-Pilot

Series A Ask: $15M · Seeking strategic investors to dominate 10 key states

Background & Market Opportunity

64M+

Americans freelance in 2023
(38% of US workforce)

50%+

Projected by 2027

$1.3T

Earned by US freelancers
in 2023

Structural Frictions for Freelancers

- No tax withholding → self-managed quarterly estimated payments & penalties
- Corporate clients impose Net 30–90 payment terms; 29% of invoices paid late
- Only 16% of freelancers have retirement plan access vs. 52% of employees
- Invoice factoring costs 1–5%/month (~15–50% APR) for liquidity

The Unaddressed Market Opportunity

- Traditional banks & fintechs were designed for salaried employees
- No single platform combines tax automation, liquidity, invoicing & retirement
- 38% of gig workers say they cannot save for retirement 40% of freelancers face cash flow issues from client payment delays

GigLedger: Four Integrated Services

One platform. Every financial need of the independent worker. No competitor combines all four.

AutoTax

Real-Time Tax Automation

- Auto ring-fences tax from every deposit
- Files Form 1040-ES quarterly automatically
- Eliminates penalties from missed payments

IncomeFlow Bridge

Income Smoothing

- Converts gigs into bi-weekly paychecks
- Revolving credit facility on earned income
- Mirrors the salaried employee experience

InvoiceNow

AI Invoice Financing

- Advances up to 85% of invoice value
- Flat fee vs. 15-50% APR factoring industry
- AI-powered risk scoring on each invoice

GigVest

Automated Retirement

- Auto-funds SEP-IRA & Solo 401(k)
- Calibrated to actual monthly income
- First employer-equivalent tool for gig workers

Competitive Landscape

Every major player dominates one lane. GigLedger is the only platform built to own all four.

Platform	Tax Automation	Income Smoothing	Invoice Financing	Retirement Planning	All-in-One Platform
Intuit / QuickBooks	✓ tax & filing	X	X	X	X
EarnIn	X	✓ wage access	X	X	X
PayPal / Square	X	X	X loans only	X	X
Fundbox	X	X	✓ lines	X	X
Betterment	X	X	X	✓ IRA / SEP	X
Lili	Partial	Partial	X	X	X
GigLedger	✓ Automated	✓ Bridge	✓ AI-Driven	✓ Auto SEP/401k	✓

**Invoice Financing = advancing funds against unpaid invoices. PayPal/Square offer merchant cash advances - a different product.*

Valuation

- Our company has a pre-money valuation of $45M
- We are asking for $15M in Series A funding (25% ownership)
- This is an opportunity to invest early, before we have positive cash flows by 2028

Management Team & Leadership

Ramin Khan

Chief Executive Officer

Leads overall strategy, product vision, and investor relations. Responsible for regulatory roadmap and go-to-market execution.

Winston Spadafora

Chief Technology Officer

Leads platform architecture, AI/ML engine development, BaaS integrations, and IRS API connectivity. Owns the technical infrastructure underpinning all four modules.

Jonathan Chin

Chief Financial Officer

Oversees financial modeling, credit risk framework for InvoiceNow and IncomeFlow Bridge, DCF valuation, and investor reporting.

Skill Gaps & Hiring Plan

- Weakness: Regulatory & compliance expertise
  - Hiring Chief Compliance Officer
- Weakness: Credit risk depth
  - Hiring Senior Risk Analyst with factoring and lending background

Funding Group Involvement

- Limited involvement in day-to-day operations
- Key role in hiring senior leadership and certain key employees
- Active involvement in future fundraising rounds and strategic introductions

Gig Ledger

AI CO-PILOT FOR INDEPENDENT WORKERS

The Investment Case — In Brief

- 64M+ Americans now freelance (38% of workforce) — structurally underserved by every existing financial product.
- The core friction is compounding: no tax withholding, no affordable liquidity (1–5%/mo factoring), and zero employer retirement.
- GigLedger is the only platform combining AutoTax, IncomeFlow Bridge, InvoiceNow, and GigVest for the independent workforce.
- At $14.99–$28.99/month, GigLedger is far cheaper than the accountants, factors, and piecemeal tools it replaces.
- We seek $15M in Series A to dominate 10 states, become cash flow positive by 2028, and scale to 250K users by 2030

Why Now?

- Gig workforce hits 50% of US labor by 2027
- BaaS infrastructure now mature enough to build on
- No dominant all-in-one platform exists yet
- Regulatory path for fintech lending is better understood

Appendix

Technology & Platform Architecture

Core Technology Stack

AI / ML Engine

Categorizes transactions, forecasts tax obligations, and dynamically calibrates retirement contribution rates to income variability.

Banking-as-a-Service Layer

Integrates with BaaS providers for FDIC-insured accounts, ACH transfers, and real-time payment rails supporting the IncomeFlow Bridge.

IRS API Integration

Direct connection to IRS e-file systems for automated quarterly estimated payment submission (Form 1040-ES).

Custodial Retirement Infrastructure

Partners with registered investment advisers/custodians to power SEP-IRA and Solo 401(k) with income-proportional auto-contribution.

Pricing Model

Basic — **$14.99/mo**

AutoTax + GigVest

Pro — **$28.99/mo**

All four modules (full platform)

Key Differentiator: InvoiceNow vs. Traditional Factoring

	Traditional	GigLedger
Advance Rate	80-95%	Up to 85%
Cost	1-5%/mo (15-50% APR)	Low flat fee
Integration	Standalone	Built-in platform

Risk Assessment & Mitigation

01 Regulatory Complexity

Risk:
Money Transmitter Licenses across all 50 states, IRS integration agreements, and broker-dealer/investment adviser registration. Each layer requires separate capital reserves and compliance infrastructure.

Mitigation:
Phased rollout starting with 10 high-gig-density states. Engage specialized fintech regulatory counsel pre-launch. Leverage BaaS sponsor bank for MTL coverage to reduce direct licensing burden.

02 Credit & Default Exposure

Risk:
Invoice financing and income smoothing both create credit exposure. Industry advance rates of 80-95% leave a 5-20% loss buffer. Gig worker income volatility increases default risk vs. salaried borrowers.

Mitigation:
Conservative 85% advance ceiling on InvoiceNow. AI-driven credit scoring on invoice and income history. Reserve fund funded from financing fee revenue to absorb expected losses before they impact P&L.

03 Incumbent Platform Entry

Risk:
Intuit (QuickBooks) already serves this demographic with distribution, brand, and capital to replicate features rapidly. Lance, Lili, and Found are all funded and actively expanding their feature sets.

Mitigation:
Network effects from all-in-one integration create switching costs across all four modules. First-mover data moat grows with every user interaction. Acquisition by an incumbent remains a viable exit path.

Model Assumptions
